Risk & Compliance

Assess Risk with Precision and Accuracy

Today's dynamic marketplace requires more accurate and comprehensive understanding of your risk environment. Regulators continue to expect a more dynamic understanding of the risk characteristics of the markets your business is engaged in, whether that involves businesses, consumers or both.

The Powerlytics database provides the most complete picture of financial risk in businesses and consumers available – anywhere. The financial statements of all 27 million for-profit businesses and a complete financial picture of 144 million households in the U.S. underpin Powerlytics' propriety database and products.

Improve Your Bottom Line

Whether evaluating, scoring or ranking industry risk, consumer risk, or geographic risk, Powerlytics has the in-depth and accurate Big Data analytics and tools you need. Powerlytics allows you to approach risk from a position of strength, optimizing the inherent risk involved with making business decisions.

Over One Billion Combinations of Data at Your Fingertips

In addition to improving your bottom line with Powerlytics risk-based solutions, you can simultaneously support your conclusions with regulatory bodies. You no longer have to approach a regulatory exam with concern over whether you can defend your risk profile or the decisions you have made. Over 1 billion combinations of data are at your disposal to back up key decisions and positions taken.
